FOR PANIC EXIT DEVICES

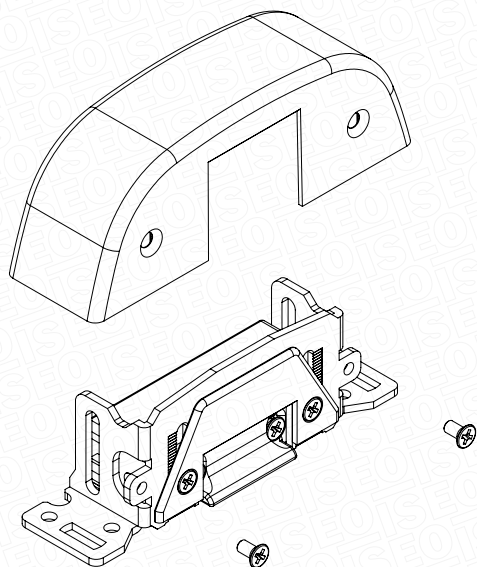

PRODUCT:

Electric strike plates for use with rim application panic exit and emergency devices of the following series: IDEA BASE, IDEA PUSH, PUSH BAR, PAD.

APPLICATION:

Installing an electric strike plate is the quickest solution for electrifying a door equipped with an Iseo rim application panic exit and emergency device.

These products may be used in conjunction with an access control system to cater for the needs of every possible application involving the use of these systems. The design of the casing and the choice of finishes and colours available mean that these products can be matched perfectly with any existing Iseo panic exit and emergency device already installed on the door.

Iseo®
