

LIBRA ELECTRONIC CYLINDER

The smart solution:
to open, control and manage the entries at your door

THE UTMOST EVOLUTION OF ISEO ELECTRONIC CYLINDER TOTALLY CONCEIVED, DEVELOPED AND MANUFACTURED IN ITALY

Libra is the innovative electronic access control system developed and created by ISEO for electronic access control. Thanks to its unique features, Libra represents the best solution for an access and security control system for commercial, industrial and residential environments.

OPEN YOUR DOOR BY UNLOCKING LIBRA WITH YOUR SMARTPHONE....

Libra smart is designed to work in combination with the Argo App by ISEO, which enables any Bluetooth Smart Ready smartphone unlock the door. Argo app and the software upgrade are always free and automatic: once the upgrade is available, it will be automatically installed on the product from your phone.

Through Argo App, administrators can intuitively manage the users' rights to access the doors.

By just tapping Argo app on your smartphone, the Libra electronic cylinder will be unblocked and grant the access at the door where Libra is installed. Easy, simple and secure!

... AND ALSO WITH TAGS AND CARDS

With the electronic control systems of the smart series, you can use as door keys also your apple watch, ISEO cards, MIFARE cards and tags, and any NFC.

YOU CAN ADD MORE USERS AND RETRIEVE EVENTS LOGS

With Argo app, up to 300 users can be added, deleted and edited for extra functionalities by administrators, who can also read out the last 1000 events of each door and send the report via e-mail.

WHY IS LIBRA ELECTRONIC CYLINDER BY ISEO THE BEST TECHNOLOGICAL SOLUTION FOR ACCESS CONTROL?

- It can be installed on new doors in conjunction with any lock case with a European profile cylinder hole
- It can also be used as retrofit to existing doors by simply replacing any existing European profile cylinder.
- It is battery operated (more than 3 years average lifetime guaranteed)

- **It doesn't require any wiring** whatsoever providing flexibility and a quick, **low cost and easy installation** solution.
- **the Heavy Duty product** version is the perfect solution for outdoor installation and for environments where resistance against weathering and manipulation are needed.
- Fits perfectly in design environments.
- Is available in the version of **Libra LE60 modular electronic cylinder** by ISEO.

Libra LE60 MODULAR ELECTRONIC CYLINDER

The flexible, easy to use, secure and stable LE60 platform by ISEO extends to Libra, which can be used with Argo and V364 access control systems by ISEO.

BENEFITS OF LIBRA LE60

□ **FAST INSTALLATION**

Libra LE60 easily adapts to any door thickness and lock position with no need of preliminary door inspection. You don't need to know the required cylinder dimensions in advance.

□ **JUST IN TIME SOLUTION**

Libra LE60 reduces the time and costs of service to customers providing an instant solution to customer's needs.

□ **MORE BUSINESS LESS STOCK**

Libra LE60 enables many business opportunities with minimal stock.

Libra LE60 is based on the LE60 platform by ISEO allowing the use of the same assembling methodology and tools of the mechanical modular systems for CSF and CSR cylinders series by ISEO.

CSF and CSR systems, are multiprofile solutions which assure customized security and flexibility and represent the ideal solutions to manage complex hierarchical structures and control accesses. They are protected from unauthorized key duplication, thanks to patented system and trademark.

CSF SYSTEM: combines F9 basic cylinders with top range F9000 mechatronic cylinders, which are available in modular configuration, guaranteeing installation flexibility and time reduction for customer service.

Modular components for mechanical cylinders fit mechatronic cylinder F9000 too.

CSR SYSTEM: works with with reversible key

WITH MULTIBLINDO eMOTION BY ISEO YOU CAN CHOOSE YOUR SECURITY AND COMFORT

The Multiblindo locks represent one of ISEO flagship products, designed to be installed on high-security metal doors. They have a wide array of uses, such as, the protection of the entrance and exit doors of homes, shops, companies, banks, laboratories, shopping centres, health buildings, etc.

The Multiblindo platform is available in three versions, which are characterised by increasing levels of security.

All Multiblindo can be installed on glass doors made with reinforced aluminium or iron edging, blind doors made with armoured steel or wood.

FREE: option recommended for free entrance business activities (shopping malls, showrooms, etc.)

TOTAL: locking option recommended for residential use (private houses, flats, etc.)

MULTIBLINDO eMOTION is a motorised and automatic multipoint lock for high-resistance doors which can be installed also on EI60 fire doors.

The peculiarity is the **electronic opening control**, which has **the possibility to be combined with an emergency or panic exit device** (anti-panic and emergency doors EN1125 and EN179).

Multiblindo eMotion electromechanical automatic lock is the perfect combination of security and comfort in any situation and it is certified according EN14846 and prEN15685 European standards.

The lock can be used not only with normal keys but also with the latest electronic control access systems.

From the outside it operates by key or the most advanced electronic access control systems: fingerscan, keyboard, transponder, PIN-code. From the inside, it operates electronically in a simple and fast way through a normal keyboard.

Multiblindo eMotion is equipped with a special system, which monitors the door status and sends opening and closing sound signals, which can be set or completely excluded by the end user. In addition, the user can set the time span between the opening pulse and the automatic relocking of the door.

Multiblindo eMotion **ensures top-level intrusion protection**; it doesn't lose the settings in case of a blackout and, if necessary, it always assures the mechanical key or handle action.

It has three options allowing an instant opening as well as to choose the automatic relocking mode according to the user's security requirements. It is operated through an electronic control for all the settings. The user can set the time span between the opening pulse and the automatic relocking of the door.

Total. When pressing the pushbutton the door opens and a sound signal is produced. When it closes, Multiblindo eMotion will automatically trigger the latchbolt and deadbolts: the sound feedback will indicate the total locking. Total security: this setting ensures your door the highest security.

Light. When pressing the pushbutton the door opens and a sound signal is produced. When it closes, Multiblindo eMotion will automatically trigger the latchbolt only: a different and more flexible security level for a partial and fast locking.

Free. With this setting, Multiblindo eMotion keeps the latchbolt and deadbolts completely unlocked: the door will stay in a free-opening status, in the classic hold-open situation. Total freedom ensuring a free access both from inside and outside until a new setting is given.

The security system is completed by a wide range of European profile cylinders by ISEO that meet the strictest security standards.

Multiblindo eMotion is the easiest way to make your door safer
