

Total quality. That's Italia

Security is a key concept for Iseo, through continuous innovation and through a highly capable team.

The headquarters in Pisogne (BS) - Italy

Iseo Serrature, a leader company since 50 years for the development and production of locking systems and access control management, headed by the President Evaristo Facchinetti, has been always reactive and has never been afraid of the market turmoils, investing in new projects.

Iseo Serrature is an historical international company, with advanced technologies, and strongly linked to its region, the lake Iseo area.

Today Iseo group has almost 1.300 employees all over the world, dedicated every day to create devices for access control management, safety and security.

Thanks to the entrepreneurial attitude of the third generation of the founding family, the group has been always characterized for the courage to exploit new success paths.

If from one side the company has never stopped the investments in the mechanical devices, on the other hand, across the years, has developed solutions for the access control.

In such a way “our production is adapting to the market trends and can cover most of the applications: from residential construction sector to the big malls and commercial buildings, Iseo solutions give to the

customer the choice how to open the door: through the traditional key or simply through a tap on his smartphone” is explained from the company.

The continuous activities in the research and development – one of the key factors for Iseo, together with the “total quality”- have allowed the creation of electronic products which give the customers the chance to open with solutions completely “touchless”.

Thanks to the innovation of Iseo today it is possible to use the smartphone or other devices (Apple watch, cards, etc.) to open the door: thanks to this approach it is possible to minimize the physical touch, which is crucial considering the current historical situation.

Creative attitude, specialization, generational continuity: these are the ingredients which will continue to make Iseo a great brand and a symbol of made in Italy.

Argo App and the electronic cylinder Libra Smart by Iseo
