

ISEO NO TOUCH OPENING SOLUTIONS: OPEN THE DOOR WITHOUT TOUCH IT!

ISEO presents its opening and access control solutions **NO TOUCH**.

Thanks to **Bluetooth** and **RFID technology** of the ISEO Zero1 electronic locking systems, combined with **automatic door operators, electromechanical and electric locks**, you can open the door with **no need to touch** handles or keys which can be used also by other people.

ISEO has the answer to your needs.

Do you need to install new products on your door, which guarantee a NO TOUCH opening solution?

ISEO will provide all products for you!

Do you have a generic electromechanical door which is installed on your door already, but at the same time would you like to convert this solution in one NO TOUCH door entry systems?

ISEO product can be integrated with other products from other brands.

Door entry system solution with **Smart Relay** and **IS9100** automatic door operator

SMART Relay

Smart Relay allows to open electric locks, automatic gates and any electric actuator through your own smartphone and Argo App by ISEO, thanks to the Bluetooth technology, even from remote (up to 10 meters).

You can enable other people's smartphone to open, even from remote and in mobility, thanks to a specific function of Argo App: in this way, contacts among people are minimized.

IS9100 - Automatic door operator

It can be installed on single or double leaf doors and be activated by the credential reader Stylos Smart or by Smart Relay, which allow the automatic opening of the door through your own smartphone thanks to Bluetooth technology, with no need to touch handles or keys which are usually shared with other people. The closing force and speed can be adjusted according to the specific needs.

These ISEO products allow the access into a specific area, in combination with one of the following products which can be chosen by the customer

- any generic electromechanical lock already installed on the door.
- **Multiblindo eMotion** electronic motorized lock by ISEO
- **Thesis 2.0** solenoid lock

Multiblindo eMotion is a motorised and automatic multipoint lock for high-resistance doors which can be installed also on EI60 fire doors.

The peculiarity is the **electronic opening control** and also it can be installed on glass doors made with reinforced aluminium or iron edging, blind doors made with armoured steel or wood.

It can be opened by the credential reader Stylos Smart, activated by your own **smartphone**, which operates the latchbolts and deadbolt of the lock. The door can be opened by the door operator IS9110, so that **you don't have to touch any handles or keys**.

Three automatic closing options are easily set: total locking with deadbolts and latchbolt, partial locking with latchbolt only, no locking (hold open). So, **you don't need to lock the door with a key**, which is usually used by other people, too.

Multiblindo eMotion is available also in the panic function version, combined with the panic exit device Pro Exit by ISEO.

The **Thesis 2.0** Standard and Thesis 2.0 Standard Latchbolt dropbolts are two locks for metal frames.

Unlike the traditional electric locks, they are designed to restore the door's security thanks to the adjustable door-closure time.

It can be opened with your own **smartphone** thanks to Argo App through Smart Relay or the credential reader Stylos Smart, with which it dialogs in a direct way through Lockbus interface, i.e. without intermediate electronic devices.

Thesis 2.0 restores the door's security thanks to the adjustable door-closure time.

It can also be installed horizontally on automatic sliding doors, and can include interlock for double-door entrances.
